EXPERIENCE

Cofounder – Full stack developer

Cuquipay

April 2023 – Present, Ecuador

- Developed a web application focused on streamlining sales management and promoting products for entrepreneurs.
- Created a robust backend using Node.js with Express, implementing 8+ API endpoints to facilitate seamless functionality and security so only authenticated users could use the APIs.
- Designed and developed a user-friendly front-end panel for efficient sales management, resulting in a significant time savings of 5 hours per week for users.
- Implemented secure login authentication mechanisms to enhance the safety and reliability of user accounts.
- Built inner tools such as a one-click pdf converter of its delivery chronograms or sales data filters so the entrepreneurs spend less time working in Excel and more time on their product.
- Designed and implemented a unique user interface specifically tailored for clients, enabling entrepreneurs to effectively showcase and sell their products.

Full stack developer

Almacenes Marriott

April 2023 – August 2023, Ecuador

- Developed an e-commerce platform for Almacenes Marriott with the primary objective of enabling clients to negotiate product prices.
- Seamlessly integrated the e-commerce platform with their ERP SAP, enabling real-time data retrieval for products and facilitating the creation of new sales orders.
- Constructed a content management system (CMS) using Sanity, providing administrators with a user-friendly method to effortlessly upload product images.
- Established a MongoDB database to record all incoming sales orders, categorized into three segments: payment failures, SAP failures, and successful transactions.
- Effortlessly integrated the e-commerce platform with Paymentez, allowing clients to use a wide range of globally recognized credit cards for transactions.
- Utilized Next.js to its fullest extent, harnessing both its front-end and back-end capabilities while adhering to best practices during the development process.

Front end developer

Long Lost Friends

June 2022 – January 2023, Remote, LA

- Successfully completed 10 distinct NFT projects for renowned clients, including ambushdesign.io, a3op3nworld.io, moodiesnft.io, flycloudniners.com, nowunitedmusical.io, ghostofthedeep.io, kokiesnft.io, vandalz.io, thejpeffect.io, and metarica.io.
- Demonstrated meticulous attention to detail while developing projects, ensuring seamless user experiences across desktop and mobile views, and incorporating a wide array of animations, conditional rendering, and reusable components.
- Developed projects with GSAP library complex animations and also a wide range of functionalities, including galleries, buttons, navbars, modals, filters, and more.
- Built projects following React best practices, adhering to industry standards, and employing TypeScript to create robust and reusable components.

Front end developer

Paragons NFT

April 2022 – July 2022, Remote

- Collaborated with a cross-functional team of designers and developers to successfully deliver the front end of the application, resulting in a seamless and cohesive user experience.
- Developed and implemented various components for the applications, including visually appealing galleries, a feature-rich music player, dynamic filters, and interactive models such as connect wallet and paragons characteristics, resulting in a 20% increase in user engagement.
- Leveraged API information from the back end to create visually appealing and data-driven functionalities, such as conditionally rendering images, data, or applying dynamic style classes, resulting in a 15% improvement in loading time and enhanced user satisfaction.
- Translated design mockups into responsive and interactive web pages by writing clean, modular, and maintainable code.

Freelance developer

Salinassailingweek, Saeta and Marciafernandez

- Developed and deployed 3 websites for clients as a freelance developer. salinassailingweek.com, saeta.com, and marciafernandez.com.
 - Built websites being proficient in HTML, CSS, React and Next.js, and related front-end technologies.
 - Designed and built the salinassailingweek.com website to promote the sailing regatta and venue around the world.
 - Created marciafernandez.com with the aim of showcasing and promoting her photography artwork.
 - Developed saeta.com with the objective of raising awareness and promoting the coffee producer's brand.
-
